

CBT Thought Record Worksheet

Cognitive Behavioral Therapy — Thought Monitoring

Instructions: Use this worksheet to identify and challenge automatic negative thoughts. Complete each column from left to right. Rate emotions on a scale of 0-100%.

Situation	Automatic Thought	Emotion (0-100%)	Evidence For	Evidence Against	Balanced Thought	Outcome (0-100%)

Thought Record — Reflection

Review your completed thought record

What patterns do you notice in your automatic thoughts?

Which cognitive distortions appear most frequently?

How did your emotions change after identifying balanced thoughts?

What evidence was most helpful in challenging your thoughts?

What would you tell a friend who had the same automatic thought?

What coping strategies can you use when these thoughts arise again?
